The disclosure is objected to because of the following informalities.

- (a) In the Brief Description of the Drawings section, each of the figures should be discussed individually.

Appropriate correction is required.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 20, 22, and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are incomplete.

- (a) Claims 20, 22, and 23 are incomplete because they depend from cancelled claim 19.

Claims 1-11, 13-16, 18, 20, 22-26, and 28-34 are rejected under 35 U.S.C. 102(b) and (e) as being clearly anticipated by either one of Chen et al (J. Biomedical Optics 2(4), 364 (1997)) or Lockhart et al (U.S. Patent No. 6,344,316). This rejection is repeated for reasons already of record (*e.g.*, Office action mailed August 11, 2004, page 5). Applicant's argument (response filed January 11, 2005, pages 21-23) is not convincing. Applicant argues that neither of the references discloses the use of probes that can hybridize to more than one target nucleic acid. This argument is not convincing. Lockhart et al discloses (*e.g.*, paragraph bridging columns 71-72, column 72, lines 43-46, and column 72, lines 51-54) cross-hybridization of probes with target nucleic acids. Cross-hybridization is the hybridization of more than one target to a given probe. Thus, the claimed invention is inherent in Lockhart et al. In Chen et al, the probes are described as cDNAs (*e.g.*, see page 365, column 2, first full paragraph). Thus, although not specifically disclosed, given that the probes in Chen et al are even longer than the 20-mer probes used in Lockhart et al, the degree of cross-hybridization in Chen et al would be even greater than that reported in Lockhart et al. Accordingly, the claimed invention is also inherent in Chen et al.

Art Unit: 1634

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
